Minecraft Servers are great for those who want to play Minecraft with friends, as there is no limit on the number of players allowed and while there are limitations on the maximum number of villagers you can build, you can place practically anything. You will need a high-speed internet connection and a few more dedicated resources than your average computer user may have, so if you are running your server on a VPS or physical machine, it is recommended that you go with an account that offers reliable bandwidth with enough RAM and CPU to keep up with the demands of all players who are online at once.",

Most weapons can be crafted using a combination of two items from the metal and wood category. For example, a pickaxe is constructed from a stone pickaxe and a piece of metal, and is more powerful than both types of weapons combined. It has an increased durability when compared to stone or metal alone but it also takes longer to craft as well as requiring more resources than either a stone or metal item would by themselves.",

The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you out. If you want to obtain the same advantages of cheats, but don't want the risks associated with cheats, then try using mods instead. Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server

administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders.",
